NUMBER 1

SPECIAL ISSUE: CELLULAR MANUFACTURING SYSTEMS: DESIGN, ANALYSIS AND IMPLEMENTATION

Mohamed I. Dessouky, Yasser A. Hosni and **M. Sadek Eid**	iii	Editors' letter
Ali K. Kamrani, Hamid R. Parsaei, Herman R. Leep and **Peter Sferro**	1	Editorial
Hassan M. Selim, Ronald G. Askin and **Asoo J. Vakharia**	3	Cell formation in group technology: review, evaluation and directions for future research
Geonwook Jeon, Herman R. Leep and **Hamid R. Parsaei**	21	A cellular manufacturing system based on new similarity coefficient which considers alternative routes during machine failure
David W. He and **Andrew Kusiak**	37	Designing an assembly line for modular products
Runwei Cheng and **Mitsuo Gen**	53	Loop layout design problem in flexible manufacturing systems using genetic algorithms
Richard E. Billo	63	A design methodology for configuration of manufacturing cells
Atul Agarwal and **Joseph Sarkis**	77	A review and analysis of comparative performance studies on functional and cellular manufacturing layouts
Phillip A. Farrington and **John W. Nazemetz**	91	Evaluation of the performance domain of cellular and functional layouts
Sung-Ho Choi and **Ji-Soo Kim**	103	A study on the measurement of comprehensive flexibility in manufacturing systems
Kim LaScola Needy, Richard E. Billo and **Rona Colosimo Warner**	119	A cost model for the evaluation of alternative cellular manufacturing configurations
Stuart Jay Deutsch, Susan F. Freeman and **Mary Helander**	135	Manufacturing cell formation using an improved *p*-median model

Ming Zhou and **Ronald G. Askin** 147 Formation of general GT cells: an operation-based approach

William T. Akright and **Dennis E. Kroll** 159 Cell formation performance measures—determining when to change an existing layout

Ali K. Kamrani, Kevin Hubbard, Hamid R. Parsaei and **Herman R. Leep** 173 Simulation-based methodology for machine cell design

David Enke, Kanchitpol Ratanapan and **Cihan Dagli** 189 Machine–part family formation utilizing an ART1 neural network implemented on a parallel neuro-computer

Brian M. Kleiner, Colin G. Drury and **Prasad Palepu** 207 A computer-based productivity and quality management system for cellular manufacturing

V. Jorge Leon and **Brett A. Peters** 219 A comparison of setup strategies for printed circuit board assembly

S. Dowlatshahi and **M. Nagaraj** 235 Application of group technology for design data management

I Announcements

NUMBER 2

Alain Chep, Luigi Tricarico, Pierre Bourdet and **Luigi Galantucci** 257 Design of object-oriented database for the definition of machining operation sequences of 3D workpieces

Ju-Seog Song and Tae-Eog Lee 281 Petri net modeling and scheduling for cyclic job shops with blocking

T. C. E. Cheng and **J. Jiang** 297 Job shop scheduling for missed due-date performance

Tai-Yue Wang, Her-Chang Lin and **Kuei-Bin Wu** 309 An improved simulated annealing for facility layout problems in cellular manufacturing systems

Esmail Mohebbi and **Morton J. M. Posner** 321 Sole versus dual sourcing in a continuous-review inventory system with lost sales

Haldun Aytuğ and **Can A. Doğan** 337 A framework and a simulation generator for kanban-controlled manufacturing systems

Yu Cheng 351 Solving push-out conflicts in apron taxiways of airports by a network-based simulation

S. T. Enns	371	Work flow analysis using queuing decomposition models
Moshe Eben-Chaime	385	Spreadsheet calculations for the machine interference queueing model
A. Michiotis, D. Xerocostas and **N. Galitis**	391	A new integrated system for selecting mining equipment
Utpal Roy and **V. Ramana Dasari**	399	Implementation of a polygonal algorithm for surface–surface intersections
G. Miraç Bayhan and **Mahmut Bayhan**	413	Forecasting using autocorrelated errors and multicollinear predictor variables
Collin Wang, Li-Shing Ho and David J. Cannon	423	Heuristics for assembly sequencing and relative magazine assignment for robotic assembly
Y. F. Zhang and **J. Y. H. Fuh**	433	A neural network approach for early cost estimation of packaging products
Hadi Gökçen and **Erdal Erel**	451	Binary integer formulation for mixed-model assembly line balancing problem
Li-Chih Wang and **Shao-Ying Wu**	463	Modeling with colored timed object-oriented Petri nets for automated manufacturing systems
J. N. Pan	481	Reliability prediction of imperfect switching systems subject to Weibull failures
R. Nagarajan, R. N. Kumar, R. A. Halim and **Arman Rosli**	493	A predictive fuzzy logic controller for resin manufacturing
T. N. Wong and **C. B. Leung**	501	Conversion of box-shaped features for manufacturing applications
John G. Cherng, Xin-Yu Shao, Yubao Chen and **Peter R. Sferro**	515	Feature-based part modeling and process planning for rapid response manufacturing
Srinivasaraghavan Parthasarathy and **Chandrasekharan Rajendran**	531	Scheduling to minimize mean tardiness and weighted mean tardiness in flowshop and flowline-based manufacturing cell
Haitham M. Al-Deek, Sherif S. Ishak and **A. Essam Radwan**	547	Impact of traffic diversion with ATIS on travelers' safety

Note
Jay Liebowitz, Phillip Kevin Giles, Tom Galvin and George Hluck 559 The role of knowledge-based systems in serving as the integrative mechanism across disciplines

NUMBER 3

Shing I. Chang and Thomas R. Samuel 565 A control point methodology for CUSUM control charts

S. Cem Karacal 573 A novel approach to simulation modeling

Richard A. Followill and Dinesh S. Dave 589 Financial cost inclusive reformulations of inventory lot size models

K. H. Lee, J. K. Lee and N. S. Park 599 Intelligent approach to a CAD system for the layout design of a ship engine room

Bhaba R. Sarker and Haixu Pan 609 Designing a mixed-model assembly line to minimize the costs of idle and utility times

Jeong-Wook Kim and Young-Gul Kim 629 Effect of information resource control on IS effectiveness: empirical validation

I. T. Dedopoulos and Y. Smeers 643 An age reduction approach for finite horizon optimization of preventive maintenance for single units subject to random failures

Manuel D. Rossetti and Gordon Clark 655 Evaluating a queueing approximation for the machine interference problem with two types of stoppages via simulation optimization

Gur Mosheiov 669 Vehicle routing with pick-up and delivery: tour-partitioning heuristics

Wenhong Luo 685 An integrated inventory system for perishable goods with backordering

Note
Abraham Grosfeld-Nir and Boaz Ronen 695 The complete kit: modeling the managerial approach

NUMBER 4

Mohamed A. Ahmed, Talal M. Alkhamis and Douglas R. Miller 703 Discrete search methods for optimizing stochastic systems

Ina S. Markham, Richard G. Mathieu and **Barry A. Wray**	717	A rule induction approach for determining the number of kanbans in a just-in-time production system
John P. T. Mo and **Bryan C. K. Tang**	729	Petri net modelling and design of task oriented messaging system for robot control
Murali Krishnamurthi and **Sanjeev Thallikar**	743	A deadlock detection interface to a commercial simulation language
S. M. Taboun, N. S. Merchawi and **T. Ulger**	759	A two-stage model for cost effective part family and machine cell formation
Johnny K. C. Ng and **W. H. Ip**	777	The strategic design and development of ERP and RTMS
Maged M. Dessouky	793	Scheduling identical jobs with unequal ready times on uniform parallel machines to minimize the maximum lateness
Chris W. Barfoot and **M. Yousef Ibrahim**	807	Development of an adaptive fuzzy behavioural control system with experimental and industrial applications
S. Zolfaghari and **M. Liang**	813	Machine cell/part family formation considering processing times and machine capacities: a simulated annealing approach
Dingwei Wang and **Wei Wang**	825	Earliness/tardiness production planning approaches with due-window for manufacturing systems
Ayse Kavusturucu and **Surendra M. Gupta**	837	A methodology for analyzing finite buffer tandem manufacturing systems with *N*-policy
